

FREQUENTLY ASKED QUESTIONS

♥ *What's happens during a color analysis?*

When you arrive, you'll get comfortably seated with a mirror in front of you. I'll be behind you with a series of fabric color strips and samples that I'll place over your shoulders. Together we'll look at which colors are most congruent, harmonious and flattering with your skin, hair and eye tones.

We'll begin by placing a white cape over your shoulders and down to your waist (like when you get a haircut). If you color your hair, we'll also add a scarf to color your head. These white drapes minimize distractions from different colors so we can really hone in on your skin tone and get the truest indication of your natural eye color. After that set up, we'll start with silver and gold and then move to additional colors. The goal is to identify a family of colors (your own palette, so to speak) which make you radiant.

After we've determined your best palette, we'll walk you through how to use the samples you'll get. They will help you create outfits from your closet and make shopping easier.
